American Model United Nations General Assembly First Committee

GA First/II/2

SUBJECT OF RESOLUTION: Countering the threat posed by improvised explosive devices

SUBMITTED TO: The General Assembly First Committee

The General Assembly First Committee,

Noting that action by this body has passed previous resolutions that recommend measures be taken collectively to counter the threat of improvised explosive devices,

Observing that many of these actions have not been adopted and acted upon by a majority of the represented states of the United Nations,

Bearing in mind this body's resolution and 70/46 of 5 December 2015, 71/72 of 5 December 2016, and 71/187 of 25 July 2016 of the General Assembly,

7 Recalling also the International Ammunition Technical Guidelines' Glossary of Terms, Definitions and Ab-8 breviations,

Information which is recommended to be shared includes, but is not limited to, identities of precursor materials and known smuggling locations, locations of known improvised explosive devices manufacturing, identities of known individuals and/or groups that utilize IEDs, the modus operandi of the aforementioned individuals and groups, any local knowledge regarding IED use and manufacturing, and successful methods of IED prevention or response,

Recognizing the disproportionate impact of improvised explosive devices on Member States with significant non-state actor activities.

16 Deeply concerned with the rise in utilization of improvised explosive devices within the global community 17 by non-state actors,

Expressing its appreciation for programs and international organizations such as Interpol and Global Shield,

Seeking effective monitoring mechanisms to specifically regulate production of chemical explosive precursors, commercial explosives, and dual use components,

Alarmed by the absence of strict regulations and "know your customer" measures by businesses and companies in the industry,

Recalling draft Resolution II/1 of 19 November 2017,

- 1. Designates, for the purpose of this resolution, the following definitions:
- (a) The term improvised explosive device (IED) is defined as a device placed or fabricated in an improvised manner incorporating explosive material, destructive, lethal, noxious, incendiary, pyrotechnic materials or chemicals designed to destroy, disfigure, distract or harass. They may incoporate military stores, but are normally devised from non-military components;
- (b) The term explosive remnants of war (ERW) is defined as unexploded ordnance and abandoned explosive ordnance that remain after the end of armed conflict;
 - (i) The sub-term unexploded ordinance is defined as explosive ordnance which has been primed, fuzed, armed or otherwise prepared for action, and which has been dropped, fire, launched, projected, or placed in such a manner as to constitute a hazard to operations, installations, personnel or material and remains unexploded either by malfunction or design for any other cause;
- 2. Encourages an increase of information-sharing in order to mitigate the current lack of regional communication and cooperation through the promotion of collaboration between custom officials, border police, law

enforcement, and intelligence agencies of neighboring and regional countries, this could be accomplished through furthering the role of Interpol (Improving transnational communication of information):

- (a) Information which is recommended to be shared includes, but is not limited to, identities of precursor materials and known smuggling locations, locations of known IED manufacturing, identities of known individuals and/or groups that utilize IEDs, the modus operandi of the aforementioned individuals and groups, any local knowledge regarding IED use and manufacturing, and successful methods of IED prevention or response;
- 3. Further recommends the strengthening of Program Global Shield to increase border cooperation between nations;
 - 4. Recommends the establishment of procedures to help remove supplies used to manufacture IEDs, and recognizing that explosive remnants of war can potentially be acquired by non-state actors in order to extract and obtain precursor materials, and further recommends that explosive remnants of war be included in the definitions of IEDs;
- 5. *Encourages* synchronizing counter IED measures at an international level through the allotment of technical, financial, and material support to most affected countries, including:
 - (a) Voluntary foreign aid to affected countries' counter IED task forces;
 - (b) Sharing of information and technology to properly recognize and disarm IEDs;
 - (c) Training programs for affected countries' police, IED task forces, and other relevant organizations;
- 6. Stresses sustained support to victims of IEDs through establishment of specific funds and allotment of resources to those affected;
 - 7. Recommends the installation of an educational framework through relevant bodies, such as, UNESCO (United Nations Educational Scientific and Cultural Organization) based on Prevention, Detection, Reaction and Knowledge (P.D.R.K. Method) of mines and IEDs to be promoted at an international level and to be scaled to the needs of individual regions:
 - (a) The suggested method of implimentation is an internationally printed informational pamphlet to be sent to regions in need that lays out the four pillars of the method with one page of the four pages dedicated to a respective pillar;
 - (i) Prevention: understanding how to realize, recognize and report the use or construction of an IED;
 - (ii) Detection: inform and understand how to detect the possible usage of an IED;
 - (iii) Reaction: what to do in the situation of an active crisis involving IEDs;
 - (iv) Affirms that IEDs pose the single largest threat to a number of United Nations peacekeepers particularly missions in rural areas;
 - 8. Affirms that IEDs pose the single largest threat to a number of United Nations peacekeepers particularly missions in rural areas;
- 9. Calls upon all Member States to promote information sharing on crude bombs and other specialized systems to prevent IED attacks on United Nations peacekeeprs and other personnel.

Passed, Yes: 65 / No: 32 / Abstain: 25
