SUBJECT OF RESOLUTION: Towards disability-inclusive sustainable development: implementation of the Beijing Declaration

SUBMITTED TO: The Economic and Social Commission for Asia and the Pacific

The Economic and Social Commission for Asia and the Pacific,

Reaffirming the methods of equal accessibility for the physical environment as listed in the Convention Of Rights of Persons with Disabilities Article 9,

Recalling the definition of “reasonable accommodation” according to the Convention on the Rights of Persons with Disabilities Article 2 as, “necessary and appropriate modification and adjustments not imposing a disproportionate or undue burden, where needed in a particular case, to ensure to persons with disabilities the enjoyment or exercise on an equal basis with others of all human rights and fundamental freedoms”,

Recognizing the need for “reasonable accommodations” for people with disabilities within modern societies,

Understanding the uneven distribution of resources and wealth among developed and developing countries,

Acknowledging that regional standards are important to provide goals for infrastructure development, but ultimately recognizing that Member States can and should tailor their development to their population’s specific needs,

Noting with deep concern the disproportionate amount of progress and growth between the infrastructure sectors of developed and developing countries,

Emphasizing that Member States have a moral obligation to invest in projects to make infrastructure accessible to all people, and the United Nations must work to end discrimination against all people on the basis of disability,

Acknowledging the obstacles that have previously prevented ESCAP from progressing on this issue and using their combined knowledge and creativity to devise solutions, while also recognizing that there is still long way to go towards achieving disability-inclusive sustainable development,

1. Calls upon Member States to address physical and structural barriers to transportation use by people with disabilities in their State;

2. Emphasizes the need for greater research and outreach specific to Member States in order to allow States to better address the infrastructure concerns of their disabled population;

3. Encourages Member States and the United Nations to closely consult with and actively involve persons with disabilities in decision-making processes to ensure infrastructure legislation and implementation will actually resolve transportation barriers;

4. Advises Member States to develop and maintain investment in transportation infrastructure to ensure that those systems are safe, reliable, accessible and affordable for all people;

5. Suggests the following implementation of revision for digital infrastructure:

   (a) Access to digital infrastructure for all peoples in all regions despite geographical distance from urban centers;

   (b) Implement collection of data to determine a sustainable accessible network throughout countries;

   (c) All people should have equal access to public internet communicators in public as well as private residences;

6. Advocates for the expansion of existing programs to outfit private homes with adequate infrastructure for people with disabilities:
(a) Encouraging the consideration of the plan from the Disabled Persons Federation of the People’s Republic of China to improve the homes of people with disabilities as an example;

7. **Advises** states to increase investment in rural infrastructure to improve access to healthcare for people in rural areas:

   (a) Allowing for an increased access to healthcare for people with disabilities;

   (b) Ensure that all peoples, despite large distances from urban centers, should all have equal access and quality of healthcare access, especially in rural areas;

   (c) Constructing new paths and roadways through rural areas, in order to ensure that healthcare workers can reach patients;

   (d) Increase medical centers in rural areas to ensure that people with disabilities in these areas receive adequate treatment and support;

8. **Invites** Economic and Social Council (ECOSOC) members to assess public spaces and their accessibility for people with disabilities:

   (a) Create an increased number of public facilities that allow for easy access for people with disabilities;

   (b) Increase the availability of green spaces for people with disabilities;

   (c) Eliminate physical barriers that limit access in public spaces to people with disabilities;

   (d) Develop a set of general guidelines that allow for increased accessibility in public spaces.

Passed by consensus, with 0 abstentions
