

American Model United Nations
General Assembly Plenary (Concurrent)

GA Plen/II/4

SUBJECT OF RESOLUTION: Global health and foreign policy

SUBMITTED TO: The General Assembly Plenary (Concurrent)

The General Assembly Plenary (Concurrent),

1 *Emphasizing the efforts of UN-Water and World Water day,*

2 *Recognizing the human right of accessible Water, Sanitation and Hygiene (WASH),*

3 *Aware of the fact that 700 million people in 34 different countries around the world are considered water*
4 *scarce,*

5 *Keeping in mind 80% of waste water flows back into the ecosystem without being treated or reused,*

6 *Observing poverty within developing states,*

7 *Fully alarmed by the lack of clean water in developing states,*

8 1. *Calls upon UN-Water and relevant United Nations bodies to construct infrastructure and distribute tools*
9 *that further water safety and sanitation:*

10 (a) Infrastructure needed includes but is not limited to;

11 (i) Dams;

12 (ii) Sewage systems;

13 (iii) Wells;

14 (iv) Rain water harvesting and purifying systems;

15 (v) Water recycling systems;

16 (vi) Desalination plants;

17 (vii) Drainage systems;

18 (b) Tools needed include but are not limited to;

19 (i) Water filters;

20 (ii) Sewage pipes;

21 (iii) Heavy machinery;

22 (iv) Water tanks;

23 (c) Tools and infrastructure should be made available to all Member States that lack access to clean
24 water;

25 2. *Urges* all Member States to provide water services to regions lacking clean water;

26 3. *Encourages* all Member States and other entities to commit resources and personnel to facilitate clean
27 water projects;

28 4. *Stresses* the importance that Member States should consider their capabilities when committing resources
29 such as:

30 (a) Financial capital;

31 (b) Experts;

32 (c) Implementation program;

- 33 (i) Educational programs;
34 (ii) Creating knowledgeable workers;
35 (iii) Sustainable system;

36 5. *Promotes the education of Member States on the proper amounts of water consumption per person per*
37 *day in order to reduce waste of clean water by:*

- 38 (a) Spreading awareness of the lack of clean water in developing countries;
39 (b) Educating Member States on the proper amount of water consumption per person per day, which
40 is between 50 and 100 liters;

41 6. *Suggests the expansion of methods for controlling runoff water such as:*

- 42 (a) Transitioning away from toxic fertilizers and pesticides;
43 (b) Utilizing clean methods of fertilization including;
44 (i) Organic fertilizers;
45 (ii) Plant compost;
46 (iii) Animal compost;
47 (iv) Crop rotation;
48 (c) Emphasizing that planting trees, shrubs or grasses along the edges of fields can provide an
49 environmentally friendly buffer to prevent runoff at a very low cost.
